

MAIN FEATURES

- Guaged steel bar.
- Malleable cast-iron jaws.
- Finely threaded screw.
- Non-slip brake on moving jaw.
- Cross-shaped handle allowing great pressure.
- Swivel head with enclosing surround preventing loss.

MATERIALS AND FINISHING

All raw materials without exception used in **Ind. Piqueras** tools come from countries within the European Union. This guarantees maximum quality and permits easy and full control.

 400 kg		 18x7 mm			
COD	 cm	 cm	 cm	Kg	
01012	12	7	6	0,42	10
01015	15			0,45	
01020	20			0,50	
01025	25			0,55	
01030	30			0,60	

FOUNDRY WORK

- **Malleable Grey:** EN-GJMW 400-5 quality under EN1567 rule.
- Finishing, thermal decarburising treatment, shot blasting, phosphating and electrostatic RAL 3004 red colour epoxy polyester painting.
- Guaranteed tracking realised using the alphanumeric codes embossed on all pieces throughout their whole productive life-casting date and number and its place in the tooling.

The cast iron pieces used in our tools easily and clearly pass all kinds of tests on hardness, resistance and elasticity.

All the pieces carry a casting date and number which make all quality controls easier and allow a complete tracking of the piece. The careful design also guarantees optimum mechanical performance.

BAR

- 18x7 mm
- C1018 quality steel (80 Kg/mm² pressure)
- Cold rolled steel with rounded edges
- Bluish-white zinc coated steel without Hexavalent-Chromium

BRAKE

Anti-slip tempered steel on moving jaw.

SCREW

White zinc coated steel without Hexavalent-Chromium.

PACKING AND LABELLING

In packets of ten (box)
Individually coded label EAN-13

APPLICABLE RULES

All work carried out following ISO:9001 and ISO:14001 rules.
